

Name :

Class :

Section :

Roll No.

I. Write the following numbers in expanded.

(4 x 1 = 4)

Ex : $92 = 90 + 2 = 9 \text{ tens} + 2 \text{ ones} = 9(10) + 2(1)$

1) $28 = \square + \square = \square \text{ tens} + \square \text{ ones} = \square + \square$

2) $98 = \square + \square = \square \text{ tens} + \square \text{ ones} = \square + \square$

3) $64 = \square + \square = \square \text{ tens} + \square \text{ ones} = \square + \square$

4) $35 = \square + \square = \square \text{ tens} + \square \text{ ones} = \square + \square$

II. Write the short form of each of the following.

(4 x 1 = 4)

Ex : $2 \text{ tens} + 6 \text{ ones} = 2(10) + 6(1) = 20 + 6 = 26$

1) $3 \text{ tens} + 9 \text{ ones} = \square + \square = \square + \square = \square$

2) $4 \text{ tens} + 2 \text{ ones} = \square + \square = \square + \square = \square$

3) $8 \text{ tens} + 9 \text{ ones} = \square + \square = \square + \square = \square$

4) $2 \text{ tens} + 2 \text{ tens} = \square + \square = \square + \square = \square$

III. Use the symbol $<$, $>$ or $=$.

(3 x 1 = 3)

1) $18 \square 22$ 2) $32 \square 18$ 3) $13 \square 13$

IV. Circle the greatest number among the following.

(2 x 1 = 2)

1) 24, 18, 12, 21, 20, 17 2) 5, 16, 26, 9, 8, 2

V. Circle the **least** number among the following. (2 x 1 = 2)

- 1) 5, 12, 9, 8, 7 2) 16, 5, 0, 4, 3

VI. Write the number which comes immediately **after**. (2 x 1 = 2)

- 1) 50, 2) 79,

VII. Write the number which comes immediately **before**. (2 x 1 = 2)

- 1) , 9 2) , 36

VIII. Write the number which comes **between**. (2 x 1 = 2)

- 1) 40, , 42 2) 25, , 27

IX. Arrange the following numbers in **ascending order**. (2 x 1 = 2)

- 1) 75, 15, 55

- 2) 10, 20, 16

X. Arrange the following numbers in **descending order**. (2 x 1 = 2)

- 1) 20, 40, 25

- 2) 35, 50, 40
