Listening and Speaking

- I. The Great Wall of China is a series of stone and earthen fortifications in northern China, built to protect the northern borders of the Chinese Empire. Several walls have been built since the 5th century BC in China that are referred to collectively as the Great Wall. Majority of the existing wall was built during the Ming Dynasty.

While some portions north of Beijing and other tourist centres have been preserved and even extensively renovated, in many locations the wall is in ruins. Sections of the wall have also been destroyed. It is China's biggest and most popular tourist attraction. The length of the wall was over 6,000 kilometres.

Answer the following questions.

[6 × 1 = 6M]

1. The passage is about the Great Wall of _____.
2. The Great Wall of China is a series of stone and earthen fortifications in southern Japan.
