Listening and Speaking

I. Listen carefully as your teacher reads out a passage about constellation. Then answer the following questions. (5 x 1 = 5M)

A constellation is a group of stars visible within a particular region of the night sky. Some are named after animals and some after mythological characters. Some constellations were also named after scientific instruments. Constellations can be viewed after sunset and before sunrise. Also, as the earth turns, you can see different constellations.

There are many constellations, of which some are legendary figures such as Hercules and Pegasus. Others are animals, such as Leo the lion and Taurus the bull. They are used to help people find their locations and give directions, just as we use addresses to locate houses.

1) Name two constellations named after animals.

2) Name two things constellations are named after.

3) What are constellations ?

4) How are constellations helpful ?

5) When can you see constellations ?
